Edit: I am using SQL query string in an application written in C#.Net Framework 4.0 Edit2: I am using Oracle.DataAccess.dll version 4.112.3.1 in .Net Framework 4.0 A: Here is a link to a discussion between me and Tom Kyte on a possible solution for your problem. The outcome is that you can check if the value you get from the query is null and then perform the insert of null. If it is not null then perform the insert as usual. Thank you Post-script Post-script is an addendum that is added to a letter, written on a separate sheet of paper, after the official text, but before the signature of the person receiving the letter, and sometimes enclosed in an envelope. It is also known as a post-hoc addendum. A post-script may contain, for example, changes to the content of the letter, or requests for the author's signature (for example, on a cheque or invoice) or information on some event in the author's life after the date of the letter. A post-script is sometimes attached to an official document by mistake. In some jurisdictions, it is an offence to attach a post-script to a public document without the consent of the document's legal owner. References See also Address (disambiguation) Post note Category:Typography Category:Legal documents[Chemiluminescence and luminol-dependent chemiluminescence of blood serum in children with diabetes mellitus]. The authors examined 40 children (15 girls, 25 boys) suffering from IDDM aged 7-17 years, in order to evaluate the diabetogenic action of the nutritional state in childhood on the organism. The test revealed an important role of the nutritional state of the organism for the development of the parameters of oxidative-antioxidative status of the organism in diabetes mellitus in childhood. The risk of the development of the dysfunctions of humoral immunity is high in children with an unsatisfactory diet in adolescence, because of disturbances in the parameters of oxidative-antioxidative status of the organism. Depletion of Lactobacillus and Bifidobacterium and altered gut microbial population in overweight children. To determine the composition of the gut microbiota in overweight children and to determine its correlation with 82157476af
